

Chair Report, Steve Loosley

May 5, 2019

On May 3rd, I joined Dr. Thatcher to attend a hearing on HB 5005 before the Subcommittee on Capital Construction. The bill authorizes the state to sell GOBs, one of which reauthorizes up to \$8,125,000 of XI-G matching bonds for the Umpqua Community College Industrial Technology Building. No one questioned our project, so it's very likely our bonds will be re-approved by the legislature.

David Littlejohn, Guy Kennerly, and I were interviewed by the accreditation evaluators. I also participated in the exit interview. Dr. Thatcher plans to inform the Board during our May meeting about the plan to implement the evaluators recommendations. Please reach out to me if you have questions.
